PAST EVENTS

GDG ON CAMPUS MUJ

GIT & GITHUB
LINUX
WINTER OF CODE

Three past events by GDG on Campus, Manipal University Jaipur, and how they connect.

1 About GDG on Campus MUJ

GDG on Campus, Manipal University Jaipur is a student community of developers and tech enthusiasts. It runs workshops, hackathons, tech talks and study jams that connect classroom learning with how software is built in industry. Its events are open to beginners and experienced developers alike.

This document summarises three past events: the Git and GitHub Workshop, the Linux Workshop and Winter of Code.

2 Git and GitHub Workshop

ITEM	DETAILS
Date	Thursday, 9 October 2025
Time	2:30 PM to 5:30 PM
Venue	Dr. TMA Pai Auditorium, Manipal University Jaipur
Format	In person, hands-on
Registrations	394 RSVPs on the event page
Speakers	Rakshat Pratap Singh (GDG Organiser), Yashaswi Bhardwaj and Karthikey Joshi (Tech Team Leads)
Mentors	Kedar Parikh, Mihir Sanghvi, Yash Paliwal, Manan Choudhary, Ekaagra Gupta, Akarsh Kumar, Aadesh Chaudhari

A hands-on session on using Git and GitHub for collaborative development. It showed how version control is used in hackathons, personal projects and large team projects, and introduced open source and how to make a first contribution to a project.

3 Linux Workshop

ITEM	DETAILS
Date	Saturday, 31 January 2026
Time	10:00 AM to 1:00 PM
Venue	Dr. TMA Pai Auditorium, Manipal University Jaipur
Format	In person, hands-on
Registrations	477 RSVPs on the event page
Organisers	Rakshat Pratap Singh, Bhavya Nanda, Nandika Garg

An introduction and deep dive into Linux for beginners and for students who wanted a stronger understanding. It covered what makes Linux different, how the system is structured, and the command-line tools developers use every day, with hands-on practice throughout. Participants also worked on tasks together and learned about open-source environments.

4 Winter of Code

Winter of Code is GDG on Campus MUJ's open-source programme run over the winter break. Participants pick real issues from participating projects, work on them with guidance from mentors, and submit pull requests. It builds directly on the Git and GitHub Workshop: the version-control skills taught there are the ones used to contribute during Winter of Code.

5 How these events connect

EVENT	MAIN SKILL	LEADS TO
Git and GitHub Workshop	Version control and collaboration	Contributing to open source
Linux Workshop	Command line and system basics	Working comfortably as a developer
Winter of Code	Real open-source contributions	Building a public portfolio

Next up: The RAG Workshop, 3 November 2026

Event details and rules are in the other two documents.
