GUIDELINES & RULES

THE RAG WORKSHOP

3 NOVEMBER 2026
RLHC 0104
2:00 PM ONWARDS

What to bring, the dress code, the rules in the room and how to get help.

1 What to bring

- **A laptop with Google Chrome** and a fully charged battery. Phones and tablets cannot run the notebook.
- **A Google account**, so you can open and save the Colab notebook.
- **A free Groq API key** from console.groq.com. Create it before you arrive. Setting it up in the room is slow.
- **One or more PDF files** to chat with, such as lecture notes, a syllabus or a club rulebook. Text-based PDFs work best. Scanned PDFs also work because the notebook reads them with OCR, but they take longer.

2 Dress code

The dress code is **casual**. There is no formal attire requirement. Wear whatever you are comfortable sitting in for two hours.

3 Operating system

Any laptop works: **Windows, macOS, Linux or ChromeOS**. Everything runs inside the browser on Google Colab, so you do not need to install Python or any other software.

4 Arrival and seating

Please be seated by 1:50 PM. Sit near a power socket if your battery is low. Keep the aisles clear so volunteers can reach every row, and do not run charger cables across walkways.[1]

[1] Power sockets in RLHC 0104 are limited. Arrive early if you need one.

5 Rules during the session

1. **Keep your API key private.** Store it in Colab Secrets as GROQ_API_KEY. Never paste it into a code cell, a chat message or a shared screen.
2. **Save your own copy.** Open the notebook link, then choose File, Save a copy in Drive before running anything.
3. **Run cells in order.** Do not run ahead of the speaker. If you fall behind, use Runtime, Run before.
4. **Raise your hand if a cell shows an error.** Volunteers walk around during every hands-on block. The speaker will not pause the session for one error.
5. **Keep your laptop on silent** and your phone away during explanations.
6. **Ask questions at the right time.** Quick questions go to volunteers. Bigger questions are welcome in the Q&A at the end.

6 Using documents responsibly

- Upload only PDFs you are allowed to use.
- Do not upload documents that contain other people's personal data, passwords, or confidential material.
- The text of the passages you ask about is sent to the language model through the Groq API. Treat it as you would any online service.

7 Code of conduct

Be respectful to speakers, volunteers and other participants. Help the person next to you if they are stuck. Harassment of any kind is not tolerated. If something makes you uncomfortable, tell any organiser or volunteer.

8 Troubleshooting

PROBLEM	WHAT TO DO
"GROQ_API_KEY not found"	Add a Colab Secret named GROQ_API_KEY, turn on notebook access, then run the cell again.
No text extracted from a PDF	The PDF may be a scan. Wait for OCR to finish, or try a text-based PDF.
The embedding model download is slow	The first download is about 90 MB. Wait about 30 seconds and do not re-run the cell.
"Rate limit" or model error	The notebook switches to a backup model automatically. If it keeps failing, wait one minute.
"I couldn't find this in the uploaded PDFs"	That is the correct answer when your PDFs do not contain it. Ask about something your PDFs cover.

9 After the workshop

Your copy of the notebook stays in your Google Drive, so you can keep using your chatbot. The slides and the notebook link are shared in the GDG on Campus MUJ event group after the session.

10 Getting help

During the session, ask any volunteer or wait for the Q&A. After the session, post your question in the GDG on Campus MUJ event group.

Laptop. Google account. API key. A PDF.
That is all you need. See you at 2:00 PM in RLHC 0104.
